The sign-in page.

2. Your dashboard

After signing in you land on the dashboard. It answers one question: *what needs my attention today?*

- 1 The four cards count your **active**, **completed**, **guarded** and **failed** cases. Click a card to see those patients.
- 2 **Ready for Second Stage** lists patients whose implants have passed their healing period. The number shows how many implants, and *Day 148 of 90* means 148 days since placement against a 90-day plan. Click a row to open that patient.
- 3 The **bell** at the top right shows the same reminders, plus follow-ups due this week and extraction sites due for an implant. The same reminders also come as a daily email.

The screenshot shows the OSIOLOG Dental Implant Management System dashboard. The interface includes a left sidebar with navigation links: Dashboard, Patients, Analytics, Stock, Clinics, Backup, and Subscription. The main content area is titled 'Clinical Cases' and features four summary cards: Active Cases (5), Completed Cases (0), Guarded Prognosis (0), and Failed Cases (1). Below these is a 'Ready for Second Stage' section with two patient entries: Ramesh Iyer (sample) and Anita Rao (sample). At the bottom, three summary cards show 28 Total Implants, 1 Clinics, and 27 Healing Phase. The top right corner displays user information (Dr. Mk) and a notification bell icon.

Dashboard. The left menu takes you to Patients, Analytics, Stock, Clinics, Backup and Subscription.

3. Add your clinics

Add every clinic you work at, including the ones where you only visit as a consultant. Your role at each clinic decides which finances you see.

- 1 Click **Clinics** in the left menu, then **+ Add Clinic**.
- 2 Optional: paste the clinic's **Google Maps link** and click **Fetch Details** to fill in the name and address.
- 3 Under **My role at this clinic**, choose **Clinic owner** for your own clinic, or **Consultant** if you visit to treat patients and are paid a fee.
- 4 Fill in the address and phone, then click **Add Clinic**. The card shows **My clinic** or **I consult here**.

Your clinics, each with its role.

Save Changes

The role choice in the clinic form.

Free plan: the free plan allows one clinic. To add more, upgrade from **Subscription**.

Choose which finances you see

Beside the bell there is a small wallet button. Click it and choose what money to show: **Both**, **Clinic owner** (your clinic's charges, payments and costs) or **Consultant** (only the fees you earn at clinics where you consult). Your choice is saved to your account, so your phone and computer show the same view.

The "Show finances as" menu beside the bell.

4. Add a patient

- 1 Click **Patients** in the left menu. Use the search box to find someone, or the letters on the right edge to jump.
- 2 Click **+ Add Patient** .
- 3 Enter the name, age and gender. Then choose the **Clinic** this patient belongs to. It decides whether their finances count as your clinic's or as your consulting.
- 4 Phone, email, address and medical history are optional; you can add them later. Click **Add Patient** .

The patient list, filtered with the search box.

6. The panoramic chart

The chart is drawn like a panoramic X-ray (OPG), using FDI tooth numbers. It is an **illustration** of what you have recorded, not a radiograph and not to scale.

- 1 **Pick a tooth:** click it on the drawing, or click its number in the **Tooth sites** grid under the chart.
- 2 **Read its records:** the panel on the right shows everything saved for that tooth: implant brand and size, torque, ISQ, dates, abutment, crown and lab.
- 3 **Add a record:** the buttons in the panel open the matching form, with the tooth number already filled in. The chart redraws as soon as you save.
- 4 **This case** at the bottom of the panel totals the whole mouth: implants by type, abutments, crowns, bridges and missing teeth.

 — Implant (dashed = planned)
 — Zygomatic
— Pterygoid
— Crown / bridge
— Overdenture
— Full mouth rehab

Tooth 36 selected: its implant, abutment and crown appear on the right. The tags in the grid (IMP, CRN, PON, MISS, PLAN, FAIL) summarise each tooth.

Colours used on the chart and in the grid:

- Failed, waiting to be removed
- Missing / extracted
- Grafted socket
- Implant (dashed = planned)
- Zygomatic
- Pterygoid
- Crown / bridge
- Overdenture
- Full mouth rehab

Classic chart: on paid plans, the **Switch to classic chart** button above the chart shows the older tooth-by-tooth chart instead. The free plan shows the classic chart only. Both charts use the same records and forms.

7. Record missing teeth

- 1 Select any tooth, then click **Missing** in the panel.
- 2 In the window that opens, tap every tooth that is missing. You can mark several at once.
- 3 Click the red button to save. Missing teeth show as faint outlines tagged **MISS**.
- 4 To undo, select the tooth and click **Undo missing**.

 **Mark Teeth as Missing** ×

Select all teeth to mark as missing. They will be saved to the patient record.

Mark 1 as Missing

Cancel

Several teeth can be marked missing at once.

8. Log an implant

- 1 Select the tooth, then click **Implant** in the panel.
- 2 Optional: upload a photo of the implant's **tag or package label**. If it has a QR code, the form fills itself in.
- 3 Fill in the brand, system, diameter and length, plus torque and ISQ if you measured them. Then the approach, surgery date, follow-up date and **clinic**. The clinic starts as the patient's clinic.
- 4 Tick any that apply: cover screw, healing abutment, membrane, pterygoid, zygomatic or subperiosteal. Then save.

Several implants in one visit? Use **Add Multiple Implants** above the chart to enter them all in one table.

9. Zygomatic and pterygoid implants

On the panoramic chart these are drawn from the crest up into the zygoma or the pterygoid plate, with their length.

- 1 Select an upper tooth: 12–16 or 22–26 for zygomatic, 17, 18, 27 or 28 for pterygoid. Buttons that don't apply to that tooth are greyed out.
- 2 Click **Zygomatic** or **Pterygoid**. The normal implant form opens with that box **already** ticked.
- 3 Enter the length (for example 42.5 or 45 mm) and save. Teeth 12–13 and 22–23 are drawn on the anterior path, 14–16 and 24–26 on the posterior path.

15. Failed implants

A failed implant goes through two stages: first it is still in place, waiting to be removed; then it is removed and the site is empty again.

- 1 Scroll to **Implant Records**, click the pencil icon on the implant, and set **Outcome** to **Failed**. Leave **Removed on** empty. The implant turns **red** on the chart and leaves the second-stage and follow-up reminders.
- 2 When you remove it, select the tooth and click the red **Record removal**. Enter the **Removed on** date and save.
- 3 The **Extracted Teeth** form then opens with that site and date filled in. Record any graft and whether a new implant is planned, with the waiting days. To skip, close the form.
- 4 The site now shows empty, or grafted with a planned implant. The records list shows **Failed — removed on (date)** and **Failed implant removed — Tooth site 24**.

16. Finances

Every patient has a **Financials** box near the top of their page. Your role at the patient's clinic decides what it shows:

Patient's clinic	What you see
Your own clinic	Charged to patient, clinic cost, payments received, balance due, clinic profit.
A clinic where you consult	Only your fees, your own material and other costs, and your profit. There's no payments box, because the patient pays that clinic, not you.
No clinic set	Whatever you chose in "Show finances as" beside the bell.

Log costs and charges

- 1 Open **Financials** and click **+ Log Costs** . Every implant, abutment and crown for the patient is listed, each with its clinic.
- 2 For your own clinic's work, fill in the **material cost**, **other expenses** and what you **charged the patient**. If a **visiting consultant** did the procedure, choose that and enter their fee.
- 3 At a clinic where you consult, the row is marked **My consulting**: enter the **fee you receive** and your own costs.
- 4 Use **+ Lab / Consultant / Other Charge** for anything else, then **Save All** .
- 5 Record money the patient pays with **+ Payment** . The balance due updates.

Log Costs & Charges

Every implant, abutment, and crown/FPD for this patient is listed below — fill in whichever ones you need, then save all at once.

Showing your clinic's costs only — matches the finance view you've selected.

Click **Stock** in the left menu to track implants, abutments and kits you've bought. Log a purchase, or scan a catalogue. When you pick a stock item in the implant or abutment form, it is taken off your stock automatically.

Stock.

Backup

Click **Backup** in the left menu. **Download Backup** saves all your patients and records to your computer, and **Download Photos (ZIP)** saves every photo. Restore from the same page if you ever need to.

Backup & Restore.

Need help? Click your name at the top right, then **Contact Us**.

Osiolog User Guide. The screenshots show sample patients (Anita Rao, Ramesh Iyer) created for this guide; they are not real patients. The chart is an illustration of recorded data, not a radiograph.
